In contrast to the existing reference works on the topic of food that tend to fall into the categories of cultural perspectives, this carefully balanced academic encyclopedia focuses on social and policy aspects of food production, safety, regulation, labeling, marketing, distribution, and consumption. A sampling of general topic areas covered includes Agriculture, Labor, Food Processing, Marketing, and Advertising, Trade and Distribution, Retail and Shopping, Consumption, Food Ideologies, Food in Popular Media, Food Safety, Environment, Health, Government Policy, and Hunger and Poverty. This encyclopedia introduces students to the fascinating and at times contentious and ever so vital field involving food issues. Key Features: Contains approximately 500 signed entries concluding with cross references and suggestions for further readings. Organized A to Z with a thematic Reader's Guide in the front matter grouping related entries by general topic area. Provides a Resource Guide and a detailed and comprehensive Index along with robust search and browse functionality in the electronic edition.
