With descriptive annotations of thousands of genre titles mapped by genre and subgenre this is the readers advisor's go to reference. Next to author genre is the characteristic that readers use most to select reading material and the most trustworthy consideration for finding books readers will enjoy. With its detailed classification and pithy descriptions of titles this book gives users valuable insights into what makes genre fiction appeal to readers. It is an invaluable aid for helping readers find books that they will enjoy reading. Providing a handy roadmap to popular genre literature this guide helps librarians answer the perennial and often confounding question What can I read next? Herald and Stavole Carter briefly describe thousands of popular fiction titles classifying them into standard genres such as science fiction, fantasy, romance, historical fiction and mystery. Within each genre titles are broken down into more specific subgenres and themes. Detailed author, title and subject indexes provide further access. As in previous editions the focus of the guide is on recent releases and perennial reader favorites. In addition to covering new titles this edition focuses more narrowly on the core genres and includes basic readers advisory principles and techniques.

Clinehens, 2022-03-20 No matter your field of expertise every day you're presented with seemingly impossible challenges. Issues that you or your company can't seem to crack even after weeks, months or years of trying. How do you approach these impossible challenges? Do you have a strategy that you follow or do you just hold a brainstorming session and hope for the best? Do you tell yourself Think harder and pray inspiration will strike? There's a better way to solve problems like these: improve the quality of your thinking. Better thinking, problem solving and reasoning are skills. They can be developed through self-examination, learning new frameworks and expanding our mental models. Lucky for us, brilliant thinkers, creators, entrepreneurs and philosophers like Elon Musk, Aristotle, Charlie Munger, Isaac Newton, Ada Lovelace, Albert Einstein, Frederick Douglass, Maya Angelou and Henry Ford have left behind documentation frameworks and tools for considering impossible problems. In *How to Solve Impossible Problems*, author Jennifer L. Clinehens, Choice Hacking CX That Sings, presents 7 such tools to improve our thinking and help us solve what feel like insurmountable challenges. In each chapter she gives specific actionable advice, real world examples and, in a free companion course available February 15, 2022, provides worksheets to help apply each principle.
